interests & hobbies

I love working with my hands, being involved in fabrication and learning new techniques. I do lots of sewing, make costumes and accessories, and create my own patterns. I've done some sculpting and upholstery, and my next project is to learn how to make stained glass windows. I love cinema and theatre (I'm also an actor, recently graduated from drama school), I also do martial arts and archery, and I really enjoy learning new languages and playing boardgames.
